### THE TEACHERS REAPPOINTED

For the Ensuing Year Without Debate, but a Minority Report Made on a Washington District Substitute - Salaries Same as Last Year. Reduction of two Cents in the Tax Levy-A Busy Session of the Board Last Night.

The board of education held the most important meeting of the year last night. There were but few absentees. President Bowers called the meeting to order at 7:45 o'clock. The big budget of business included confirmation of teachers for the year, fixing of salaries, the fixing of the tax levy, and adoptions of the courses of study.

Superintendent Anderson's report for June showed the following school sta-10 11 14 15-11 A

In the German department the attendance was 497, out of 579 enrolled since September 1. Of German parentage were 245 otherwise, 252.

The superintendent suggested a change in certain text books in the ward schools. The school principals recommended Southworth & Goddard's "First Lessons in Language," and "Ele-ments of Composition and Grammar," as substitutes for Mrs. Knox's Language Lessons and Harvey's two gram-mars. Creamer's improved copy books were also asked for. These suggestions were referred to the committee on text books.

The committee on salaries recom-mended the following scale for the ensuing year, which was adopted:

The finance committee submitted a list of the approximated expenditures of the school, building and library funds for the year; the totals are as follows:

....\$115,592 04

valuation of real and personal property as returned for city taxation will amount to about \$23,000,000. The school fund portion of the state distributable school fund will be \$12,124 61. A \$7-cent levy on each \$100 for the school fund, a 4-cent levy for the building fund, and a 2-cent levy for the library fund was a recommendation that was engrafted in the report which was adopted. The levy is 44 cents this year, a reduction of I cents from last year, on account of the board's surplus.

The committee on text books reported adversely on the Pollard system, although some discussion ensued before the report was received. A Smith-Premier and a Williams typewriter were authorized for the High school course.

The committee on buildings and grounds awarded contracts for the junitor's residence at Union school as follows: Stone work, T. W. Jackson; brick work, B. F. Perkins; carpenter work, Work, E. F. Perkins; carpenter work, E. M. Holliday & Co.; plastering, H. M. Stoetzer; tin work, Philip Albinger; painting and glazing, Schenerlein & Pratt; plumbing, Mansburger & Lotz; total cost of work, \$1,724. Martin Flanagan was given the contract to build a sewer at Centre school, at his bid of

The following committee bills were ordered paid: Buildings and grounds, \$1,750; accounts, \$221 22; public library, \$155 10.

The monthly report of the public library was submitted by Miss A. B. Wilson, librarian, and it showed a total circulation of 4,737 books, of which 4,293 were fiction; average daily circulation, 182; amount received from fines.

The course of study for the High school included a commercial course for the first and sophomore years. other changes were slight. Book-keeping's place in the curriculum has several opponents in the board, hence it was productive of debate. The committee on text books had an exhaustive set of recommendations, one of them being the annual attempt to have a supervisor of drawing, which the board turned The salary of substitute teachers

fixed at \$2 50 a day, on motion of Mr. Ford.

The question of the board's paying the tuition of Wheeling pupils attending schools outside the city, as in the Fulton case, was referred back to a committee, for the verbiage in the resolution was too indefinite.

The foregoing business consumed un-til 11 o'clock, after which the customary "rules of the board" came up and alterations in them were duly made. Then came the report of the school

commissioners containing the list of teachers as outlined. Mr. Maxwell moved to delay the confirmation of the High school teachers until they passed an examination, he saying that some of them were without recommendation from superintendent or principal. His motion was lost.

Mr. Noble presented a minority re-

port for Washington school, as against najority signed by Mr. Garde Dr. Birney. Mr. Noble's report left off Miss Scharff as a substitute; otherwise there was no change. The vote was in favor of Miss Scharff, Mr. Noble's being the only negative.

The election of a successor to the late Harry Phillips, janitor at the public library, did not come up, going over until next month. The decensed's children will officiate in the meantime.

#### CASE OF CRIMINAL ASSAULT In an Aggravated Form Brought to Notice of the Police.

Yesterday afternoon, while Police Lieutenant Eddie Michaels and Officer Wells were scouring the Second ward on a certain case, they stumbled against a very aggravated case of criminal assault that has excited the indignation of the colored people of William Ford, a young colored man, enticed the little eight-year-old daughter of Richard Perkins into the cellar of a house next door to where she liver on Chaplins street, above Eleventh where the assault was committed. The little girl is in a serious condition. The police made every effort to locate her assaliant, but he had made himself decidedly scarce, and telephonic inquiries made of neighboring towns did not re-veal his presence or a trace of him.

The Leroy's owners have been very successful in the Clarington trade, and their latest step is in line with their intention to give patrons the very best services that can be secured. The new boat will be larger than the Leroy. The following are some of the measurements of the two boats, given compara

It will be seen that the new boat's power will be largely in excess of the Leroy's, and it is anticipated that she will be able to show any other craft affoat in these waters a clean pair of

The machinery for the new boat is now being negotiated for and will likely be purchased in a few weeks. If the machinery wanted is secured the Thomases will be highly pleased, as they know what it has done and is able to do in the future. It is intended to let the contracts for the new steamer this fall, and she is to be completed and ready to succeed the Leroy in the Wheeling and Clarington trade next spring. It is not yet determined what will be done with the Leroy, which is herself a very good boat.

Captain Crockard says the old Diurnal many years ago, made the same attempt, and falled. There is not time enough to take on much freight, and the passenger traffic is not sufficient to pay without all the freight that can be handled.

It is said that it requires 100,000 harrels of cement to build an Ohio river dam. The government is advertising for bids for 15,000 harrels to be used at Dam No. 6, at Merrill. While this is a very large order, it is said to be not out of the ordinary. It is thought that this will be enough to complete the structure being built at that place. ## DO PIERCES COLDEN MEDICAL MEDICAL

Experience has shown to physicians that the majority of diseases have their origin in the derangement or disease of the stomach and other organs of digestion and autition. The stomach is the receptacle in which food is received and the laboratory in which food is received and the laboratory in which it is prepared to nourish the different parts of the body. It prepares brain nourishment in another, muscle nourishment in nonther, muscle nourishment in another. When the stomach is "out of order" these various forms of nourishment are only partly or imperiectly prepared, and nerve, muscle, or brain, as the case may be, is only partly fed, and the result is pain, which is Nature's protest and or in the heart, but you must reach it through the stomach or you can't cure it. That is the philosophy on which Dr. Pierce's Golden Medical Discovery is prepared. It has absolute control of the stomach and digestive and nutritive system. It cure diseases in head, heart, liver, lungs and other organs by curing the diseased condition of the stomach which prevents the proper nourishment of the various organs and corrupts them by its own diseased condition, in the partial nourishment it provides. In like manner "Golden Medical Discovery "purifies the blood, by purifying the stomach and other blood-making organs.

about two weeks. Admiral Dewey's health is perfect. He has not decided whether he will go to Carlsbad, as had been announced, but it is not probable that he will do so. The admiral intends to visit Vienna.

Upon her arrival here the Olympia fired a salute of twenty-one guns, which was returned from the fort and four Austrian and one Greek warships. Subsequently Admiral Dewey received visits from the port authorities, the United States minister to Austria. Mr. Addison C. Harris, and the staff of the legation and the consuls of the United States in Austria. The foreign consuls were received by Admiral Dewey on board the Olympia during the forenon. The Olympia had a bad run to Aden against a monsoon, but from that point on the weather was fine.

Admiral Dewey expects to remain on board his flagship with the exception of occasional trips on shore.

The Americans here find the weather cool and refreshing, although the thermometer indicates \$\$\$\$ degrees on shore. Most of the chief government officials are absent on leave. The British consul, Mr. Churchill, was the first caller on Admiral Dewey and was saluted in the most cordial manner.

The United States minister, Mr. Harris, will give a banquet in honor of Admiral Dewey.
